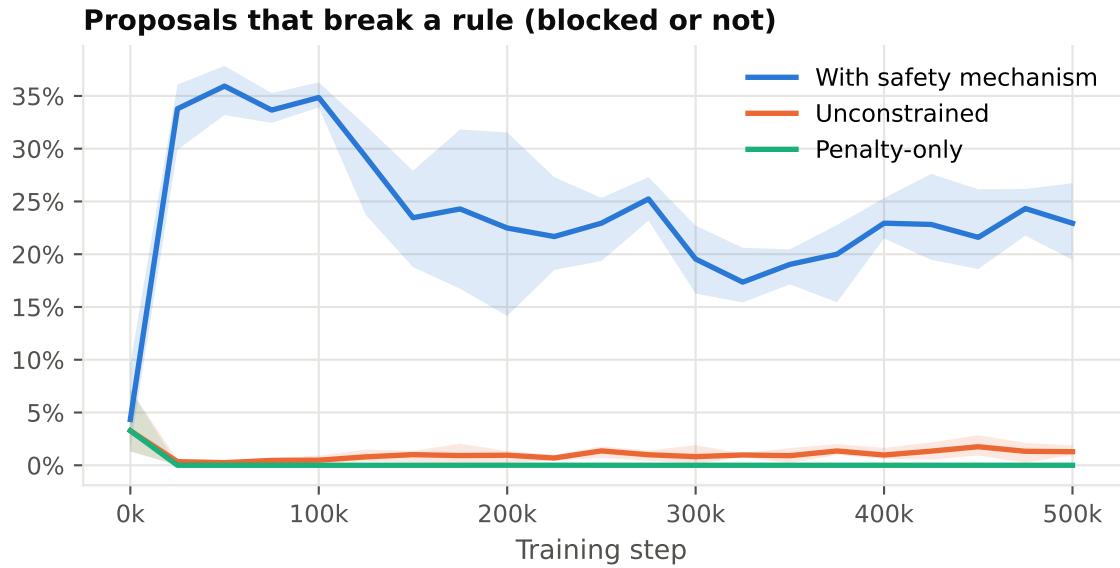
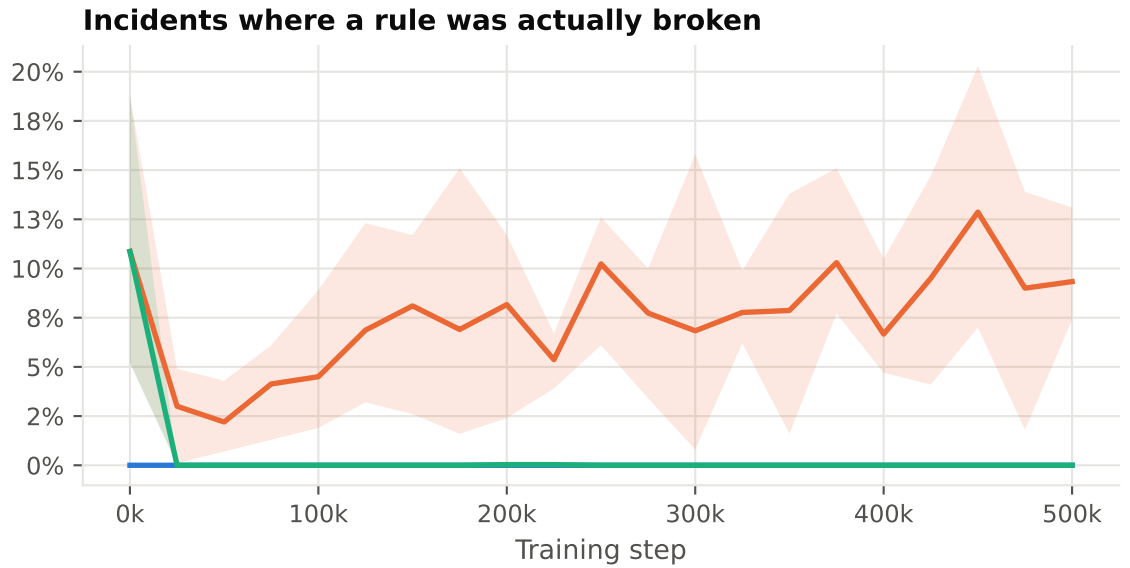
Does each agent learn to act within the rules?





With the safety mechanism a rule-breaking proposal is blocked, so no rule is broken by construction; without it the proposal executes. Training monitor: 1,000 fixed monitoring incidents every 25k steps, greedy policy (not the evaluation incidents). Line = mean over seeds; band = lowest to highest seed. Model v2 (pilot developer, Part 2) with fix-with-verification settings; the verification values are researcher-provisional. Pilot data, not Directorate data.
