A problem report comes in
Someone reports a fault. The system's log is attached.
Key facts are picked out
Each fact is copied word for word from the report or log, so a person can check it.
The assistant chooses a step
Look into it further, try a fix, or hand it to a person.
Rulebook check
Steps the team's rules forbid are blocked. Blocked twice, a person takes over.
Action is taken and recorded
Fixes are tested first and wait for a person's approval. Every outcome is written down.
